Induna

Training & Occupational Safety Practitioners

BUSINESSES
CONSTRUCTION
CONTRACTORS

A labour inspector can walk in any day. Be ready.

Risk assessments, legal appointments, construction safety files and safety officers for any business under the OHS Act, and for contractors on construction sites.

Free OHS Act compliance check
No cost, no obligation. Details on the back.

Compliant on paper. Safe on site.

EST. 2011 · HEAD OFFICE: WELKOM

WHY INDUNA

We learned safety on South Africa's mines. Now we bring that standard to your business.

300+
years of combined experience in mining, engineering and safety

1,000+
risk assessments and safety documents written and reviewed

2011
founded, with our head office in Welkom

150+
contractor safety files compiled for our clients

WHAT WE FIX

~~Generic templates bought online~~	**Written for your workplace,** your equipment and your people.
~~Missing appointments and old risk assessments~~	**We find the gaps and close them,** from legal appointments to risk assessments, before an inspector or your client does.
~~Deadlines that keep slipping~~	**A delivery date in writing** before any work starts.

We write safety documents for South Africa's gold mines, where inspections are some of the toughest in the country. **Your business gets the same standard.**

OUR PROMISE

If an inspector or your client sends back a document we wrote because of our mistake, **we fix it at no charge.**

Founded in 2011 by Casper Maree, who has worked in mining since 1985 — at Anglo, then Harmony, then as founder of SafeSure (1999).

WHAT WE DO

What we put in place for you.

01 · FOR YOUR BUSINESS

The basics every workplace must have

- A written risk assessment of your workplace
- The legal appointments: the CEO's Section 16(2), health and safety representatives, first aiders and fire marshals
- A health and safety committee, policy and procedures
- An emergency and evacuation plan, and a fire risk assessment

02 · FOR CONSTRUCTION CONTRACTORS

Safety files to get on site

- Construction safety files under the Construction Regulations
- Health and safety plans, fall protection plans and method statements
- Contractor safety files built to your client's requirements

Safety officers

Qualified safety officers at your workplace or construction site, full-time or when you need them.

Audits and ISO

OHS Act compliance audits. ISO 45001, 14001 and 9001 implementation and internal audits, to get you ready for certification.

Incident investigations

Investigations, and reporting injuries to the Compensation Fund (COIDA).

Traffic management plans

Safe routes for forklifts, trucks and pedestrians in warehouses and yards.

Why it matters: an inspector from the Department of Employment and Labour can order work to stop, issue notices with deadlines, and under the OHS Act the CEO stays accountable. For warehousing, manufacturing, construction, transport, retail, hospitality and healthcare.

START WITH A FREE CHECK

Find the gaps before the inspector does.

No cost and no obligation. By video call or at your office. Pick one:

1. **Free OHS Act compliance check**
   We check your appointments, risk assessments and plans, and send you a written list of what is missing.
2. **Free safety file check**
   For construction work or a client's requirements: a written list of the gaps before work starts.
3. **Free call with a consultant**
   Fifteen minutes to talk through your workplace, your deadline or your client's requirements.
