Induna

Training & Occupational Safety Practitioners

MINES
CONTRACTORS

Your safety documents will be inspected. Make sure they pass.

MINE HEALTH AND SAFETY ACT 29 OF 1996

Codes of Practice, risk assessments, procedures and standards for mines. **Safety files and onboarding** for the contractors who work on them.

READY
FOR INSPECTION

Free COP or safety file check
No cost, no obligation. Details on the back.

Compliant on paper. Safe on site.

EST. 2011 · HEAD OFFICE: WELKOM

WHY INDUNA

We know what gets safety documents sent back. So we write ours to pass.

300+

years of combined experience in mining, engineering and safety

1,000+

Codes of Practice and risk assessments written and reviewed

30,000+

hours spent on safety documents for our clients

150+

contractor safety files compiled for our clients

WHAT WE FIX

~~Copy-paste templates with your name typed in~~	**Written for your site,** your equipment and your people.
~~Documents rejected by the mine or inspector~~	**COPs follow the DMPR guideline clause for clause,** with every referenced document attached as an annexure.
~~Deadlines that keep slipping~~	**A delivery date in writing** before any work starts.

Our COPs have been **accepted by the DMPR without instructions to revise**, and have passed multiple audits.

OUR PROMISE

If the mine or the DMPR sends back a document we wrote because of our mistake, **we fix it at no charge.**

Founded in 2011 by Casper Maree, who has worked in mining since 1985 — at Anglo, then Harmony, then as founder of SafeSure (1999).

WHAT WE DO

Everything your safety system needs, on paper and on site.

01 · FOR MINES

Codes of Practice, procedures and standards

- Mandatory Codes of Practice, to the DMPR guidelines, clause for clause
- Risk assessments (baseline, IBRA, TBRA and continuous) and bowties
- Managerial instructions, procedures, SOPs and STPs
- Electrical, mining and engineering standards
- Management plans and training material built on your procedures

02 · FOR CONTRACTORS ON MINES

Get on site sooner

- Safety files built to each mine's own index, section for section
- Risk assessments and procedures for your scope of work
- ComplyWorks and other mine onboarding: registration and uploads done for you

Safety officers

Qualified safety officers on your site, full-time or when you need them.

Audits and ISO

Legal, compliance and system audits. ISO 45001, 14001 and 9001 implementation and internal audits, to get you ready for certification.

Accident investigations

Full investigations and legal reports under the Mine Health and Safety Act.

Traffic management plans

Route planning and site map design for safe vehicle and pedestrian movement.

More detail online: indunatrng.co.za/mining.html for mines, and indunatrng.co.za/contractors.html for contractors.

START WITH A FREE CHECK

Find the gaps before the inspector does.

No cost and no obligation. Send us your documents, book a video call or bring them to our office. Pick one:

1. **Free Code of Practice check**
   We check your COP against the current DMPR guideline and send you a written list of what is missing.
2. **Free safety file check**
   We check your file against the mine's own index and send you a written list of the gaps.
3. **Free onboarding call**
   We explain what the mine needs from you to get on site, and give you a fixed quote to do it for you.
